

## Advanced and Innovative Technology Makes Wood Look Better For Longer

Ecolife™ Stabilized Weather-Resistant Wood is a new wood preservation technology, and is a fully integrated wood preservative system with built-in protection from the detrimental effects of weathering.

The Ecolife preservative system is AWPAs standardized as a **complete system**, combining next-generation fungicides, biocides, and mold inhibitors for maximum protection and enhanced performance.

### Ecolife Stabilized Weather-Resistant Wood

- ▶ Innovative non-metallic preservative **AWPA standardized** as a fully integrated system
- ▶ Advanced stabilizer system **significantly reduces** cracking, checking and splitting caused by the effects of weathering
- ▶ Fewer culls, less waste, and **fewer callbacks**
- ▶ **Lifetime limited warranty** against fungal decay and termite damage

Ecolife is a Green Approved Product listed by the NAHB Research Center and is eligible to earn points towards Green Certification under the National Green Building Standard.™

## Painting and Staining or Natural Weathering

Ecolife can be painted or stained to match any outdoor color scheme. High-quality oil and latex based paints and stains are recommended. Water repellent coatings can be applied to enhance the long-term weathering performance. It is important that the wood is dry and clean prior to applying any coating. Left uncoated, or with clear water-repellent coatings, Ecolife will initially weather to a natural brown color, eventually turning gray following long-term exposure to the sun.

## Nails, Fasteners and Connectors

Ecolife is much less corrosive to fasteners than traditional treated lumber products. Fastener corrosion performance matches that of untreated wood. For the best results, use of building-code approved, corrosion-resistant fasteners and connectors is always recommended.

Ecolife also eliminates concerns about aluminum compatibility, even in consistently wet environments. Ecolife can be used adjacent to aluminum flashing with confidence.

## Applications for Above Ground Use

- ▶ Decks
- ▶ Fencing
- ▶ Trellis
- ▶ Lattice
- ▶ Gazebos
- ▶ Arbors
- ▶ Benches & Furniture
- ▶ Play sets

## Specifications

Viance provides 3-part model specifications at [www.TreatedWood.com](http://www.TreatedWood.com) and at [www.ARCAT.com](http://www.ARCAT.com).

## Ecolife is backed by a Lifetime Limited Warranty against fungal decay and termite damage.

### Product Features & Benefits

- ▶ Innovative preservative system and highly effective termiticide offers protection against Formosan termites
- ▶ Building code compliant (2009 IBC/IRC) under AWPA Use Categories U1, UC3B and ICC ESR-1851
- ▶ AWPA standardized as a fully integrated system
- ▶ Adherence to AWPA treatment standards is verified by independent third-party product inspection
- ▶ NAHB Research Center National Green Building Certified as a "Green Approved Product"
- ▶ Advanced stabilizers significantly reduce cracking, checking and splitting caused by effects of weathering
- ▶ Fewer culls, less waste, and fewer callbacks
- ▶ Easy to paint or stain

Ecolife Stabilized Weather-Resistant Wood is protected against fungal decay, termite damage, and the effects of weathering by a revolutionary non-metallic preservative system and advanced wood stabilizers. The innovative technology in Ecolife reduces the cracking, checking, and splitting that is caused by the effects of weathering. These improved performance qualities of Ecolife ensure the beauty of real wood will look better for longer, with less maintenance.

*Ecolife's proprietary preservative system improves the weathering performance of Ecolife by reducing cracking, checking and splitting.*
