Affordable Natural Beauty
Real Wood for Your Outdoor Living Spaces

Preserve® CA Pressure Treated Wood
Long-term protection for your exterior projects.

- Ideal for residential, commercial and certain agricultural projects
- Above Ground Exposed Use, Ground Contact General Use, Fresh-water Immersion, and Salt-water Splash applications
- Easy-to-paint or stain
- Lifetime Limited Warranty* against fungal decay and termite attack

Viance warranty coverage includes Above Ground and Ground Contact treated wood framing members that are critical to the safety and performance of the structure, including joists and beams

* See Lifetime Limited Warranty for terms and conditions at www.treatedwood.com

Build With Confidence
- American Wood Protection Association (AWPA) standardized wood preservative
- Field-tested, proven-to-last, and accepted as an industry standard
- Building code compliant (IRC and IBC)

Look for AWPA U1 and the Quality “CheckMark”

Quality Inspected

Only treated lumber meeting the AWPA standards bears the Quality “CheckMark” on end tags

American Wood Protection Association 2017

Platinum Sponsor

Viance Treated Wood Solutions
Residential Use & Homeowner Projects
- Decks, Porches, Arbors, Gazebos, Fences, Walkways & Retaining Walls
- Raised Beds, Planter Boxes, Outdoor Furniture, Picnic Tables & Play Sets

Commercial Use
- Sill Plates, Furring Strips, Shakes & Shingles
- Pilings, Piers, Boardwalks, Bridges & Permanent Wood Foundations
- Structural Columns, Sign Posts, Utility Poles, Building Poles & Guardrails

Agricultural Use
- Tomato & Grapevine stakes and Livestock Fencing
- Post Frame Structures, Pole Barns, Stables & Corrals

Safe Practices When Working With Pressure-Treated Wood
- Wear gloves when working with wood.
- Wear a dust mask when machining any wood to reduce the inhalation of wood dusts.
- Wear appropriate eye protection to reduce the potential for eye injury from wood particles and flying debris during machining.
- Wash hands thoroughly with mild soap and water after working with treated wood.
- All sawdust and debris should be cleaned up and disposed of after construction in accordance with local waste management regulations.
- Do not burn pressure-treated wood.
- Do not use pressure-treated wood in circumstances where it may come into direct or indirect contact with drinking water, except for uses involving incidental contact such as fresh water docks and bridges.
- Do not use pressure-treated wood in circumstances where the preservative may become a component of food, animal feed or beehives.
- Do not use pressure-treated wood for mulch.
- Treated wood may be disposed of in landfills or burned in commercial or industrial incinerators or boilers in accordance with federal, state and local regulations.

Proper Use Application

- Direct application of finishes. Proper application of finishes will prevent premature failure.
- UV exposure of wood surfaces over long periods of time can lead to damage.
- Always follow the manufacturer’s recommendations for dry and clean application of finishes. Left uncoated and without UV protection, exposed wood will discolor, dry out, and become less resistant to repainting.

Painting and Staining
- Can be painted or stained to match any outdoor color scheme.
- High-quality oil and latex paints, stains, or water repellent coatings with UV protection are recommended to enhance the long-term beauty and weathering performance. It is important that the wood is dry and clean prior to applying any finish coating. Left uncoated and without UV protection, treated wood will initially weather to a natural brown color, eventually turning gray following long-term exposure to the sun. Always follow the manufacturer’s recommendation for proper application of finishes.

Preserve CA Treated Lumber and Plywood Specifications and Approvals
- Standardized by the American Wood Protection Association (AWPA)
- Use Categories: UC1, UC2, UC3A, UC3B, UC4A, UC4B
- IBC & IRC Building Code compliant under AWPA Standards
- International Building Code (IBC)
- International Residential Code (IRC)

Viance provides 3-part model specifications at www.treatedwood.com

Look for AWPA U1 and the CheckMark logo on the end tags of treated wood you buy as assurance the preservative is listed in, and treated to the AWPA standards, and has been Quality Inspected by an ALSC accredited third-party inspection agency. AWPA standards are directly referenced in the IBC and IRC model building codes.

Lifetime Limited Warranty*
The Lifetime Limited warranty covers Preserve treated wood against damage by fungal decay or termite infestation that makes the wood structurally unfit for the application for which it was used.

Viance warranty coverage includes Above Ground and Ground Contact treated wood framing members that are critical to the safety and performance of the structure, including joists and beams.

* See Lifetime Limited Warranty for terms conditions at www.treatedwood.com

Nails, Fasteners and Connectors
For the best results, the use of building code approved, corrosion-resistant fasteners and connectors are always required for all exterior wood projects. Direct contact of Preserve treated wood with aluminum products is not recommended.

Hot-dipped galvanized fasteners (meeting ASTM A 153) and connectors (ASTM A 653 Class G185 sheet), or better, are recommended. For Permanent Wood Foundations and corrosive environments, such as areas with saltwater spray, stainless steel fasteners are recommended.

Painting and Staining
Can be painted or stained to match any outdoor color scheme. High-quality oil and latex based paints, stains, or water repellent coatings with UV protection are recommended to enhance the long-term beauty and weathering performance. It is important that the wood is dry and clean prior to applying any finish coating. Left uncoated and without UV protection, treated wood will initially weather to a natural brown color, eventually turning gray following long-term exposure to the sun. Always follow the manufacturer’s recommendations for proper application of finishes.

Preserve® CA is a NAHB Home Innovation Labs NGBS Green Certified Product for Resource Efficiency and is eligible to contribute points toward a building certification under the National Green Building Standard®. See NGBS Green Certified Product at www.homeinnovation.com/greenproducts.
